The first of the three conditions is that the function  $f$  must be continuous. This is a natural condition to impose, since we are interested in functions that can be approximated by polynomials. The second condition is that the function  $f$  must be bounded. This is also a natural condition to impose, since we are interested in functions that can be approximated by polynomials. The third condition is that the function  $f$  must be defined on a compact interval. This is a natural condition to impose, since we are interested in functions that can be approximated by polynomials.
